

# THE SOUTH AFRICAN EARLY EVENING SKY LATE NOV / EARLY DEC 2018

To find e.g. stars in the east,  
face east and turn the map  
so that **EAST** is at the bottom.

CONSTELLATION NAMES  
ARE CAPITAL LETTERS;  
star names are lower case.

Use binoculars to look for ...

- Galaxy
- ✦ Open Cluster
- Globular Cluster
- ☄ Nebula

The Sun rises in the east  
and sets in the west

Circles show the position of the Moon

The Moon this month:  
Nov 23<sup>rd</sup>: full moon  
Nov 30<sup>th</sup>: last quarter  
Dec 7<sup>th</sup>: new moon  
Dec 15<sup>th</sup>: first quarter
